PROJECTS

Fresh Finds Farmers Market - Front End

Dec. 2019 - Jan. 2020

Created wire frames for page layouts, and component flow chart for state management.

Consulted with back end developer to help create data points for users, farms, farmers, and produce.

Used JWTs to handle login authentication for different user types.

Built login, register, farmer-dashboard, user-dashboard, shopping cart, view orders, and create-update-delete item forms using React components.
